

Green clay – sourced from Australia’s geologically ancient coastal sea bed. It is best suited for oily, blemished, congested skin types and acne. It is deeply cleansing, detoxifying and assists with removing oils and impurities by stimulating the circulation and oxygenating the cells to facilitate healing. It contains quartz and muscovite.

White clay – sourced from southern Australia. It is suitable for all skin types, specifically dry or sensitive skin. It has a soft gentle action with a low pH. It contains quartz and mica.

Yellow clay – sourced from Australia’s rainforest tablelands. It is suitable for all skin types, specifically mature or sun damaged skin. It assists with evening the tone and texture of the skin and is a revitalising tonic for tired and dull complexions. It contains yellow tourmaline, limonite, quartz, mica and geotite. **NH**
